

Angel Shark

The Angel Shark laser is a powerful green line laser. By using two lasers in a fixed bracket, calibrated at a set distance, accurate measurements from video images is possible. The Angel Shark laser is ideal for use in pipeline inspections.

By using two lasers in a fixed bracket, calibrated at set distance, measurements from video images is possible.

The new Angel Shark T6 laser with titanium housing, sapphire viewport and 6,000MSW will be available from November 2014.

Wavelength:	532nm	Length ex con:	248mm
Output:	150mW	Weight:	3,5/ 2,8kg
Lens:	60° (30°, 45°, 90° on request)	Depth Rating:	3,000MSW (6,000MSW)
Housing:	Duplex Stainlees Steel	Power:	12-32V DC / 8W
Diameter:	69mm	Connector:	5506-1508 (or optional)
